

MIZBAUR RAHMAN ZIHAD

Junior Full-Stack Developer

Sylhet, Bangladesh | +8801865662482 | zihad.pilot18@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

CAREER OBJECTIVE

I am a passionate web developer aiming to grow into a full-stack and backend developer, continuously exploring modern technologies along the way. I aspire to contribute to impactful projects in the tech industry while expanding my skills in system design and scalable architecture. In the long term, I plan to venture into AI and Machine Learning, which aligns naturally with my academic background in Mathematics.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript ES6+, TypeScript, React.js, Next.js, Tailwind CSS, DaisyUI, HeroUI, Framer Motion, responsive design

Backend: Node.js, Express.js, PostgreSQL, Prisma ORM, MongoDB, NeonDB, REST API, CRUD operations, JWT, Better Auth, Bcrypt, Modular Architecture, RBAC

Tools / Deployment: Git, GitHub, VS Code, Vite, npm, Postman, Figma, Vercel, Netlify, Render

AI Workflow: ChatGPT, Gemini, Claude, Antigravity, AI-assisted debugging, documentation support, prompt engineering

Soft Skills: Logical reasoning, Problem Solving, growth mindset

PRACTICAL EXPERIENCE

Back-End AI Engineering Intern — *FlyRank AI* | July 2026 – Sept 2026

- Architected backend API routes using Express.js & Node.js to stream LLM responses and manage asynchronous background tasks.
- Integrated vector search workflows and AI prompt pipelines utilizing PostgreSQL, TypeScript, and cloud infrastructure.
- Enforced strict API contract testing, schema validation, and remote-first version control standards.

Complete Web Development Course — *Programming Hero* | Dec 2025 – Jun 2026

- Completed extensive project-based training covering full-stack JavaScript, React, Node.js, Express, MongoDB, secure deployment, and version-controlled Git workflows.
- Developed production-ready frontend and full-stack projects featuring protected router states and smooth user authentication flows.

Next Level AI-Driven Software Engineering Bootcamp — *Programming Hero* | Apr 2026 – Present

- Mastered TypeScript foundations, advanced types, data constraints, raw SQL connection pools, and serverless PostgreSQL via NeonDB & Prisma ORM.

TECHNICAL PROJECTS

GearUp – Sports & Outdoor Equipment Rental API | [Live API](#) | [GitHub](#)

Tech Stack: Node.js, Express.js, TypeScript, PostgreSQL, Prisma ORM, SSLCommerz, JWT, Bcrypt

- Built a peer-to-peer equipment rental API supporting a 5-stage order lifecycle state machine (PENDING → APPROVED → PAID → PICKED_UP → RETURNED).
- Implemented backend booking collision-checking algorithms and multi-role RBAC separating CUSTOMER, PROVIDER, and ADMIN permissions.
- Integrated two-step SSLCommerz payment validation with server-to-server verification APIs and IPN webhooks.

ErythroShare – Healthcare & Blood Donation Platform | [Live](#) | [GitHub](#)

Tech Stack: Next.js 16 (App Router), Express.js, MongoDB, Better Auth, Tailwind CSS, JWT

- Engineered a multi-role healthcare coordination portal managing permissions for ADMIN, VOLUNTEER, and DONOR users.
- Built protected Express REST API endpoints with session caching and real-time blood request dispatch tracking.
- Implemented donor search indexing by blood group, district, and availability status to streamline emergency requests.

NextKey – Property Rental Platform | [Live](#) | [GitHub](#)

Tech Stack: Next.js 16 (App Router), Express 5, TypeScript, MongoDB, Monorepo Architecture

- Designed a full-stack monorepo property rental platform sharing TypeScript interfaces between Next.js App Router client and Express TS backend.
- Developed a dynamic multi-parameter database query engine for property filtering (price range, category, bed/bath count, location).
- Constructed landlord rental management dashboards with request tracking and tenant approval workflows.

EDUCATION

B.Sc. in Mathematics (3rd Year) – Shahjalal University of Science and Technology (SUST), Sylhet | 2023 – Present

- Core Focus: Analytical Problem Solving, Discrete Mathematics, Logic Optimization, Algorithms.

CERTIFICATIONS & LANGUAGES

Certifications: Complete Web Development with MERN Stack – Programming Hero (2026, Pending); Next Level Software Engineering Certification (Ongoing).

Languages: Bangla – Native; English – Intermediate Professional Working Proficiency, comfortable with technical documentation, code reviews, and developer communication.
